

ClassLink Rostering with mySciLEARN

The mySciLEARN platform provides student and staff access to Carnegie Learning's Fast ForWord and Reading Assistant programs.

mySciLEARN supports importing student data in OneRoster 1.1 format using the ClassLink OneRoster REST API.

mySciLEARN supports the OAuth 2.0 protocol.

ClassLink Rostering with mySciLEARN

For in-depth instructions on setting up ClassLink Rostering, see this mySciLEARN Help article:

- [ClassLink Rostering & SSO](#)

Follow this condensed list of steps to get started with Classlink Rostering.

In ClassLink Roster Server:

1. Add the mySciLEARN app (ClassLink Dashboard, under Apps)
See this ClassLink Help article: [Applications: Adding Applications & Modifying Permissions](#)
2. Enable permissions for the mySciLEARN app.
3. Allow access to Demographics.
4. Make sure Demographics data has been uploaded.

When these steps are completed, mySciLEARN will sync with your ClassLink Roster Server every night at 11pm (Pacific).
